

DJEZZY BACKBONE DASHBOARD

Executive Network Report

Generated on 20 July 2026 at 21:04

This report summarizes the current backbone monitoring state with 8 devices tracked. The network shows 1 critical device(s) and 2 warning device(s). Immediate attention is recommended for 2 high CPU alert(s), 0 high memory alert(s), and 1 high latency alert(s).

Key Metrics

Metric	Value
Total Devices	8
Average CPU	53.88%
Average Memory	53.0%
Average Bandwidth	65.0 Mbps
Average Latency	19.12 ms

Status Overview

Status	Devices
UP	5
WARNING	2
CRITICAL	1

Operational Recommendations

- Prioritize critical devices immediately to prevent service degradation.
- Monitor warning devices closely and review their trends over the next reporting cycle.
- Investigate latency issues that may impact user experience and data transmission.

Device Inventory

Device	CPU	Memory	Bandwidth	Latency	Status
R1	22%	40%	35 Mbps	10 ms	UP
R2	31%	45%	48 Mbps	11 ms	UP
R3	82%	60%	91 Mbps	25 ms	WARNING
R4	94%	75%	97 Mbps	40 ms	CRITICAL
R5	35%	42%	50 Mbps	12 ms	UP
R6	60%	58%	71 Mbps	20 ms	UP

Device	CPU	Memory	Bandwidth	Latency	Status
R7	79%	65%	87 Mbps	26 ms	WARNING
R8	28%	39%	41 Mbps	9 ms	UP
